

HXM - Here is the Future

Cryptocurrency has a demonstrated ability to change the world as we know it. In recent years, cryptocurrencies have made peer-to-peer currency trading easier than ever. Now, we believe it's time to harness cryptocurrency's capabilities to change the way we do business.

What is HXM Coin?

HXM Coin is a decentralized utility token built on Ethereum (ERC-20) blockchain. The coin is designed to be as accessible and user-friendly as possible so that users worldwide can make safe and convenient transactions daily.

Like other cryptocurrencies before it, HXM Coin aims to eliminate the issues associated with traditional currencies. Thanks to blockchain technology. By using decentralization, the HXM coin effectively erases borders between cryptocurrency traders.

About HXM Coin:

Token Name:	HXM Coin
Smart Contract:	0xec1b7eb3d3cfac7027fa60b5376e5eadef4f1300
Token Ticker:	HXM
Token Platform:	Ethereum Blockchain
Token Standard:	ERC20
Max Supply:	100 Billion (Maximum amount of coins that will ever exist)
Burned:	95.55 Billion Total
Total Supply:	4.45 Billion (Max supply minus any coins that have been burned)

How Does HXM Coin Work?

HXM Coin runs on Ethereum blockchain, which secures transactions by storing them in ledgers and distributing them across various networks; this makes the currency virtually immune to

hacking or interference. The coin is much safer than conventional currencies due to the lack of a single point of contact (typically found in computer-based storing systems used by banks.)

HZM Coin's decentralized blockchain system spreads information across several different 'decision makers' who must all agree that a transaction can move forward. This method creates more privacy because no single entity or person has access to all of your information. The process also makes information harder to track, and thus, more difficult to meddle with.

HZM Coin's peer-to-peer decision-making process offers users a more reliable alternative to traditional coin transactions by protecting anonymity and increasing security. Transactions are recorded at multiple locations and by more than one person. Ultimately, decentralization makes for safer and easier transactions that aren't subject to third-party fees.

What does HZM mean?

HZM “Hazam” stems from the Arabic word for "firmness." The name represents HZM's integrity and commitment to improving safety and well-being worldwide.

Why the Camel?

The camel emblem signifies a long journey, recouping your energy and the ability to persevere in the face of life's challenges. In a broader sense, the emblem represents the potential to overcome adversity and create positive change.

Our Mission

HZM, is backed by a crypto ‘Souq’ (or market) which allows people to buy, sell and rent using crypto currencies. Alongside this unique marketplace, HZM is rolling out a slew of multi-generational mobile games.

Crypto Souq

Crypto Souq is a platform powered by HZM Coin that makes it simple and secure for assets, goods and services to be purchased, sold and rented using crypto currencies.

This platform gives users the ability to exchange value, digitally, from person to person (“P2P”), quickly, securely, and efficiently without the need to use third parties.

Crypto market is a new business model that transitioning the way we use our crypto, in other word we are not creating a new busines model; we are transitioning an entire global industry.

Crypto Souq connects Asset's owners and Crypto holders to trade in everything such as:

- Cars & Bikes
- Boats & Jet Ski
- Tools & Equipment
- Electronic & Furniture
- Properties
- Services
- Others

Crypto Souq fees

- Free for all users with regular accounts.
- Verified Users fees to be Paid in HZM.
- Companies fees to be Paid in HZM.
- Premium listing fees to be paid in HZM.
- Adding a new coin as a method of payment Fees to be paid in HZM.

Note: Pricing to be disclosed.

HZM Games

Three games backed up by crypto, where users can play for free and win crypto, to go public starting by Q4 2021:

- HZM BasketBall
- HZM Carrom
- HZM – The Camel

Why and where can I buy HZM?

HZM Coin will only be available on centralized exchanges from HZM team. To prevent any inappropriate, scam or unknown transactions. We are keen to make HZM the most transparent cryptocurrency that is available on the market. Thus, the number of wallets/holders will not be as much on etherscan, as most of the holders will be under the umberalls of the centerlized exchanges.

Roadmap:
